

Weird Cures

Weird Cures is a catalog of very strange, sometimes hilarious, often horrifying cures that were actually used by physicians, and then discredited. Some of these so-called cures are beyond belief! For instance: Mercury, now known to be highly toxic, was once thought to draw poison from the body. It was even administered for routine ills like constipation and toothaches! Strappado, a technique in which patients are strapped to ladders and dropped from significant heights, was used to correct spinal misalignments. It is now considered torture. Weird Cures is a compendium of these bizarre and sometimes fatal treatments. This fun look at medical history will fascinate and astonish, and make you laugh and gasp at the same time.
