

MCSE Training Kit (Exam 70-224): Microsoft Exchange 2000 Server Implementation and Administration (IT-Training Kits)

This official MCSE Training Kit teaches IT professionals how to set up and support Exchange 2000 Server -- as they prepare for the corresponding MCP exam. Topics include planning an implementation or upgrade to Exchange 2000 Server; configuring clients and servers, Internet protocols and services, mail and messaging systems, and security; implementing Active Directory™ services; managing access to resources; monitoring and optimizing the messaging and collaboration environment, including managing the Web Store; diagnosing and resolving problems; and more. Students learn through an integrated system of skill-building tutorials, hands-on lab exercises, and self-assessment tools. An economical alternative to classroom instruction, this kit enables students to set their own pace and learn by doing.
