

## Anxious To Do Good: Learning to be an Economist the Hard Way

After nearly three and a half -- rather too exciting -- years as a young war-time sailor, Alan Peacock expected to return to a life of quiet contemplation. Instead he became an activist economist frequently engaged in controversies about the conduct of economic policy lasting all his professional life. His earlier experiences at trying to do good will resonate with all those who have attempted to influence political action, but the account is also designed to inform and entertain those who are curious to know whether economists are actually human. The author has lived long enough to have become a Fellow of both the British Academy and Royal Society of Edinburgh and was knighted for public service in 1987.
