

Construction Accounting Manual (Simonoff accounting series)

Construction Accounting Manual has been prepared with the purpose of covering virtually every significant accounting and financial area of concern to contractors, their financial personnel, CPAs serving the industry, and users of contractors financial statements. These groups will find that the Manual constitutes an extremely valuable and practical reference guide for addressing most accounting and financial issues related to the construction industry. Furthermore, the Manual will be updated at least annually, reflecting emerging accounting and auditing standards that have an impact on contractors, changes in law and regulations, and other relevant matters that affect the financial operations of contractors. The intent has been to create a one-volume reference book to assist contractors financial and accounting personnel, and users of contractors financial statements in performing their responsibilities more effectively by providing comprehensive and current coverage of topics of financial relevance to the construction industry.
