A Few Good Men From Univac (History of Computing)

In this personal memoir, electrical engineer David Lundstrom recalls the heyday of early computing - the rise of Control Data out of the Univac division of Sperry Rand, such milestone computer systems as the Univac and the Naval Tactical Data System the exploits of CDCs top designer Seymour Cray, and the gradual corporate shift from the exciting and technically interesting world of computer design to internal politics and clumsy bureaucracy.David E. Lundstroms career spanned 30 years with Sperry Rand Corp. (now a division of Unisys Corp.) and Control Data Corporation.
