

## Body Toxic: An Environmental Memoir

For readers of *A Civil Action* and *Silent Spring*, a harrowing story of a family, a body, and a place: the Pine Barrens of southern New Jersey, one of the most environmentally contaminated places in the country. The authors family-immigrants from Italy on one side and Barbados on the other-try to realize the American dream by building a summer escape in the boglands of New Jersey where the rural and industrial collide. They picked gooseberries along the chain-link fence of Oyster Creek Nuclear Power Plant while it released more radiation than Three Mile Island. They rowed dinghies along creeks contaminated with drums of toxic waste-waste dumped illegally by various chemical companies. One by one, they discovered their own infertility, while throughout the area parents were being asked to donate their childrens baby teeth to be tested for traces of radiation. *Body Toxic* merges the personal and familial with the historical, political, and environmental in a way that creates a new genre: environmental memoir, fusing fact and meditation, the intensely intimate and the starkly political. Brave, harrowing, beautifully written, Antonettas memoir explores an American family in the midst of the wreckage of the American dream.
