

How To Create An iPhone App: Learn how I created my app by hiring freelancers, designers and coders for just \$2100.

This ultimate guide contains all of the steps i took to create my App without breaking the bank. Think of this guide as your key to creating a phone Application without any design skills or programming knowledge. Learn the steps I took to bring my App from dream to reality costing me only \$2,500! -You will learn how to hire a designer to design your application without spending thousands of dollars in the process. -Learn how to get the best out of the worldwide market by using services such as freelancer.com to hire coders and programmers from anywhere in the world. -Learn how to create buzz on different social media sites in order to ensure people are downloading your app. -Get many marketing strategies in order to put your app in front of the right user at the right time. -Use many strategies in order to come up with winning app ideas. -Learn how to test ideas to make sure you have a winning app before spending money on design and programming costs. A Book For Anyone who Has An App Idea And Does Not Know Where To Start This book was written based off what it took me to create my own app, from idea to getting the app into the App Store and everything in between. The way I see it you might have a great idea for an application so why not help you bring it into reality as well!
