

# The Future of Personal Information Management, Part I: Our Information, Always and Forever (Synthesis Lectures on Information Concepts, Retrieval, and S)

We are well into a second age of digital information. Our information is moving from the desktop to the laptop to the palmtop and up into an amorphous cloud on the Web. How can one manage both the challenges and opportunities of this new world of digital information? What does the future hold? This book provides an important update on the rapidly expanding field of personal information management (PIM). Part I (Always and Forever) introduces the essentials of PIM. Information is personal for many reasons. Its the information on our hard drives we couldnt bear to lose. Its the information about us that we dont want to share. Its the distracting information demanding our attention even as we try to do something else. Its the information we dont know about but need to. Through PIM, we control personal information. We integrate information into our lives in useful ways. We make it ours. With basics established, Part I proceeds to explore a critical interplay between personal information always at hand through mobile devices and forever on the Web. How does information stay ours in such a world? Part II (Building Places of Our Own for Digital Information) will be available in the Summer of 2012, and will consist of the following chapters: Chapter 5. Technologies to eliminate PIM?: We have seen astonishing advances in the technologies of information management -- in particular, to aid in the storing, structuring and searching of information. These technologies will certainly change the way we do PIM; will they eliminate the need for PIM altogether? Chapter 6. GIM and the social fabric of PIM: We dont (and shouldnt) manage our information in isolation. Group information management (GIM) -- especially the kind practiced more informally in households and smaller project teams -- goes hand in glove with good PIM. Chapter 7. PIM by design:

Methodologies, principles, questions and considerations as we seek to understand PIM better and to build PIM into our tools, techniques and training. Chapter 8. To each of us, our own.: Just as we must each be a student of our own practice of PIM, we must also be a designer of this practice. This concluding chapter looks at tips, traps and tradeoffs as we work to build a practice of PIM and places of our own for personal information. Table of Contents: A New Age of Information / The Basics of PIM / Our Information, Always at Hand / Our Information, Forever on the Web
