

Doing Statistics with Excel for Windows Version 5.0: An Introductory Course Supplement for Explorations in Data Analysis

This user-friendly workbook enables students to see the valuable information in data and provides them with detailed command instructions for using Microsoft Excel to accomplish the desired statistical analysis. Every chapter is designed to allow students to explore a single statistical concept by investigating a data set and consists of a summary of the statistical objective, a problem statement, characteristics of the data set, tutorials and investigative exercises.
