

Forecasting Examples for Business and Economics Using the SAS System

Numerous step-by-step examples show you--the economist, business forecaster, student, or researcher--how to use SAS to generate forecasts for a variety of business and economic data. Examples are based on both time series models and econometric models. You'll learn how to use SAS to forecast time series data using Box-Jenkins ARIMA methodology; develop and forecast transfer functions and intervention models; fit and forecast regression models with autocorrelated, heteroskedastic, and ARCH-GARCH error terms; estimate nonlinear regression models; create forecast confidence limits using Monte Carlo simulation; and more! The main focus of the book is on the code-based procedures in SAS/ETS software, but this book also provides an introduction to the interactive Time Series Forecasting System, and it shows how to plot data and forecasts with SAS/GRAPH software.

Forecasting Examples for Business and Economics Using the SAS Examples are based on both time series models and econometric models. Forecasting Examples for Business and Economics Using the SAS System by SAS

Forecasting Examples for Business and Economics Using the SAS You'll learn how to use SAS to forecast time series data using Box-Jenkins ARIMA Forecasting Examples for Business and Economics Using the SAS System.
