

## The Carry Home: Lessons from the American Wilderness

The nature writing of Gary Ferguson arises out of intimate experience. He trekked 500 miles through Yellowstone to write *Walking Down the Wild* and spent a season in the field at a wilderness therapy program for *Shouting at the Sky*. He journeyed 250 miles on foot for *Hawks Rest* and followed through the seasons the first 14 wolves released into Yellowstone National Park for *The Yellowstone Wolves*. But nothing could prepare him for the experience he details in his new book. *The Carry Home* is both a moving celebration of the outdoor life shared between Ferguson and his wife, Jane, who died tragically in a canoeing accident in Northern Ontario in 2005, and a chronicle of the mending, uplifting power of nature. Confronting his unthinkable loss, Ferguson set out to fulfill Jane's final wish: the scattering of her ashes in five remote, wild locations they loved and shared. The act of the carry home allows Ferguson the opportunity to ruminate on their life together as well as explore deeply the impactful presence of nature in all of our lives. There was a love borne of wild places, and *The Carry Home* offers a powerful glimpse into how the natural world can be a critical prompt for moving through cycles of immeasurable grief, how bereavement can turn to wonder, and how one man rediscovered himself in the process of saying good-bye.
