

# Slide Your Way Through Excel VBA: Learn to Keep Excel Under Control with VBA (Visual Training series)

A complete Excel training course, this CD-ROM contains three complete one-day modules that teach VBA basics and show how to use the macro recorder and then edit the code in order to make a usable macro. Examples demonstrate how to control charts and pivot tables using VBA, and clear explanations reveal the difference between methods and properties. The second module covers how to calculate with VBA covering loops, functions, formulas, and arrays. The third module discusses how to build a successful application that will interact with the user. Userforms and event handlers are also discussed.
