

My Brain Gets Full

In this book, Gayle Kelley movingly recounts the events and aftermath surrounding the traumatic brain injury he suffered after a dreadful fall at work. In a moments time, Gayle was faced with pervasive life-changing consequences. The impact on his life was abrupt and profound debilitating. Lost, isolated, lonely, homeless in his own body, vulnerable with no clear memory of the present or past there was no safe place to go where it felt like home. Gayle masterfully draws a vivid painting of his life now, with a special perspective for the reader, as though he or she is looking through a window pane into the mind of a person with a traumatically-injured brain.
