

Learning Android Game Development

Key Features

Be introduced to core game development topics by getting hands on with real-world 2D game development. Through this uniquely designed guide, you'll be a game developer in no time! If you're looking to move into Android game development, this is the book for you, especially if you are looking to take pride in developing games from scratch.

Book Description

Focused on 2D game development, *Learning Android Game Development* is an entry-level look at how to make games on the Android platform. You'll learn to build complete, slick, and intuitive Android games as we turn you from a beginner who has little experience into a competent 2D Android game developer. This book will improve your knowledge of the Android platform and will show you how you can start making games using your existing Java knowledge. We cover the basics of creating your game, adding in GUIs and game menus, creating online leader boards, and adding in login pages with Google + or Facebook. By the end of the book, you'll have created your first Android game and learned how to publish it to the Google Play store. What you will learn

Understand the challenges of making games in Android versus desktop
Use the fundamentals of OpenGL and its pipeline
Write reusable building blocks that are essential to making games
Write and use common algorithms that are used in games
Be able to write GLSL shaders to write amazing visuals
Understand what makes games fun to play
Distribute your first game

About the Author

Havard Kindem is a game developer from Norway, who has a long-lived passion for games and game development. He started programming at an early age, which later resulted in an MSc in game technology. During his studies, Havard became the founding member and CEO of Fallen Leaves Interactive, a group focusing on PC, Xbox, and Android development.

The company made games for clients such as KLM Royal Dutch Airlines and contributed to Games4Health. During his time in the National Lottery Association in Norway, he created multiple entertainment games both traditional and using augmented reality. Currently, Havard is employed at Schibsted as a Software developer, working with huge amounts of data in cloud solutions, enabling data science and personalization for millions of users. Havard remains an avid gamer and game developer; when he is not busy releasing a new project, he loves to return to the old classics or spend the evenings playing guitar.
