

# Interpersonal Relations and Social Patterns in Communication Technologies: Discourse Norms, Language Structures and Cultural Variables (Premier Reference Source)

The development of information and communication technologies enables dynamic social interaction through computer-mediated communication. Interpersonal Relations and Social Patterns in Communication Technologies: Discourse Norms, Language Structures and Cultural Variables describes the growing proliferation of CMC applications and the need for new perspectives, methods and tools for research and practice. This reference work explores the conceptual foundations of computer-mediated interaction, language action and discourse features in various CMC contexts. Uncovering the fundamental components of CMC and looking at interdisciplinary perspectives through a variety of research methods, this book is ideal for researchers, academics, and practitioners interested in information and communication technologies in respect to online social interactions and discourse.
