

Isaac Kashdan, American Chess Grandmaster: A Career Summary with 757 Games

This work chronicles the chess career and games of Grandmaster Isaac Kashdan, one of the leading United States players of the 1930s (along with such notables as Fine and Reshevsky). The main body of the work examines Kashdan's game play, with diagrams and analysis provided for many hundreds of his tournament games, match games, speed games, simultaneous exhibitions, training games and consultation games. Some games are accompanied by detailed contemporary analyses written by Kashdan and other prominent chess masters of his era. There are numerous photographs, as well as facsimiles of correspondence. Also included are tournament crosstables, and indexes of Kashdan's opponents.
