

I/T Architecture in Action

An award winning leader in technology, Richard J. Reese is known for his abilities to communicate technical topics all levels of management. With nearly 30 years in I/T, he has worked as a senior leader in I/T Architecture for some of the largest companies in the world. Richard leads the Enterprise Architecture function at Discover Financial Services LLC (issuer of the Discover Card). He was Vice President, Enterprise Architecture for W.W. Grainger, Inc., and was an Applications Architect at United Airlines. Working as an employee for IBM, he achieved the designation of Certified I/T Architect in 1992 and was elected to serve on the I/T Architect Certification Board in 1993. My experience is that a balance between strict rigor and organic innovation works best. The book you are about to read, I/T Architecture In Action, describes this balance. The author, Richard J. Reese, has done a fine job of blending his own experience with industry trends and facts in a book that is not too technical, yet will appeal to technicians. As he says, this is a management book about technology, not a technology book that touches on management. Diane Offereins, EVP/CTO Discover Financial Services LLC
