

Learn Command Line and Batch Script Fast, Vol III: A course from the basics of Windows to the edge of networking

The Windows command line is a commonly used tool for IT support and system administration. Batch scripting is a tool for automating the command line. If you are learning one of these, it makes sense to learn both. Learn both here! In this book, you learn how to: - connect to remote computers - use subroutines and functions - run two scripts at once - loop through files, folders, numbers, and text - handle unknown numbers of parameters - automate all of the above by using batch scripts - and more This is a book for people who want to learn command line and batch scripting fast. It features: - a step-by-step approach, with new concepts building on earlier ones - teaching by examples - concise explanations - practice exercises, with answers - the bigger picture: how and why commands may be used This book completes a three-part course. Try it today!
