

C.I.A. Cocaine in America?: A Veteran of the C.I.A. Drug War Tells All

In the 1980s, cocaine use skyrocketed in the U.S. As hundreds of tons of cocaine began flooding American cities, the U.S. government focused more and more of its resources on combatting it, and the CIA played a major role. However, with millions of dollars at stake, and the opportunity to surreptitiously influence the political and military outcomes of conflicts around the globe, the CIA quickly subverted the goals of the Drug War to suit its own purposes. Many of these later came to light as part of the Iran-Contra scandal and the California CIA-Contra cocaine story that broke in the San Jose Mercury News. Others, such as Operation Pseudo Miranda, remained cloaked in secrecy . . . until now. Appealing to his derring-do and his interest in criminal justice, the CIA recruited Ken Bucchi directly out of quiet Murray State University.
