

Managing Technology Projects

This eBook is a collection of the authors personal thoughts on how to proactively take certain actions to increase the probability of success of a technology project. Included are some thoughts on data warehouse project considerations. If you have been managing projects for a while, this eBook may not be of much value to you. The intent is to give some guidance to beginners as they advance through their careers in project management. The author has been a consultant for his entire career spanning almost two decades. He has worked with many nationally renowned firms like Deloitte Consulting, Capgemini, Knightsbridge, Hewlett-Packard to name a few. His work has taken him across multiple industries in various cities across the United States, with projects ranging from few hundred thousand dollars to over several million dollars each. The authors educational background consists of an MBA in MIS, and a Bachelor of Engineering in Computer Engineering. He is PMP certified, and a Microsoft Certified Professional.
