

## Reflections on Nelson Mandela

The world's most universally admired politician is celebrated in words and images that span the globe. Internationally renowned photographer Antoinette Haselhorst has captured Nelson Mandela on camera on numerous occasions. This unique book is a reflection on the man himself, and his significance on the global stage. Haselhorst combines her outstanding portraiture of Mandela with a series of tributes from celebrities, as well as lesser-known persons, creating a moving and colourful record of the emotions felt around the world for this very special individual. Produced under licence from the Nelson Mandela Children's Fund (who receive a royalty for every book sold), Reflections on Nelson Mandela is the only officially sanctioned book of its kind ever to be published.
