

Implementation of Organizational Innovation: Studies of Academic and Research Libraries (Library and Information Science)

Using libraries as examples, Implementation of Organizational Innovation discusses the implementation of innovation in organizations of all types. It is the first book that contains a full and systematic description of the factors which lead to successful implementation, and of the implementation process itself. The book is a valuable tool for information service professionals seeking to introduce new innovations; for corporate managers to whom innovation is no longer an option but a necessity; and for students and researchers of innovation. It is also an ideal text for courses on innovation.

Key Features* Provides a practical guide to implementation* Demonstrates new aspects of implementation through the use of examples and illustrations* Uses case study research as a practical base for organization innovations
