

## Using Microsoft Access XP: A How-To-Do-It Manual for Librarians (How-To-Do-It Manuals for Libraries, No. 120) (How to Do It Manuals for Librarians)

This easy-to-follow guide will walk you through every facet of the newest version of Microsoft Access from starting the Windows program through putting Access-created files on the library's Web page. Written especially for librarians, the guide explains various types of resources that librarians can create and manage using Access. You'll learn how to: - Design and use tables. - Update records. - Sort and filter data. - Query the database. - Create and use switchboard and other forms. - Conduct advanced queries using logical structure, relational database structure and linking tables. - Create macros that make making running reports easier. - Secure your database. - Share your database with users via the Web. - And more. Whether you are a new or previous Access user, this guide will enable you to put the full range of Access features to work for your library.
