

## Emerging Practices in Cyberculture and Social Networking. (At the Interface / Probing the Boundaries)

This book aims to present how emergent media penetrate to all fields of human cultural activity. The content of this volume reflects theoretical and practical discussions on cultural issues influenced by increased adoption of information and communication technologies. New media and Web 2.0 raise increasing attention of academics from wide range of disciplines. Papers, included in this volume, cover coherent choice of topics selected with respect to the actual state of inter-disciplinary debate on emerging media.
