

Object-Oriented Information Systems: 8th International Conference, OOIS 2002, Montpellier, France, September 2-5, 2002, Proceedings (Lecture Notes in Computer Science)

The OOIS series of conferences has provided a forum for the presentation and exchange of academic research and industrial experiences within the field of information systems, based on object-oriented technology. The

8th International Conference on OOIS was held in the University of Montpellier from 2nd to 5th September 2002. The conference focused on the design, maintenance and implementation of web-based information systems. The first day consisted of preconference workshops. The workshop themes included the specialization/generalization hierarchy, reuse, optimization in web-based information systems, and model-driven software development. The main conference program also included four invited papers, namely Corporate Semantic Webs by Dr. Rose Dieng, INRIA, France, A Framework for Defining E-business Models by Prof. Yves Pigneur, University of Lausanne, Switzerland, GRID in E-business by Pierre Sablonière, IBM, France, and The Latest Development on Cognitive Informatics by Dr. Yingxu Wang, University of Calgary, Canada. The conference attracted 116 papers from more than 20 countries and the program committee accepted 34 regular papers and 17 short papers. The selected papers included the following themes: - advanced object-information systems, - web-based information systems, - knowledge management in object information systems, - CORBA, - e-business, - software metrics, - object databases.
