

MCSA Windows 2003 Core Requirements (70-270, 70-290, 70-291)

In an effort to provide a clearer career path for IT professionals supporting Windows Server 2003, the Training and Certification team in Redmond has made significant changes to the MCSA and MCSE programs in an effort to better differentiate between skills needed by mid-level administrators and higher-level designers. Like the Windows 2000 track, the new MCSA program for Windows 2003 requires candidates to pass four exams. This box set includes Study Guides for the three core exams.
