

Computer Aided Systems Theory - EUROCAST 2003: 9th International Workshop on Computer Aided Systems Theory, Las Palmas de Gran Canaria, Spain, ... Papers (Lecture Notes in Computer Science)

The concept of CAST as Computer Aided Systems Theory, was introduced by F. Pichler of Linz in the late 80s to include those computer theoretical and practical developments as tools to solve problems in System Science. It was considered as the third component (the other two being CAD and CAM) that will provide for a complete picture of the path from Computer and Systems Sciences to practical developments in Science and Engineering. The University of Linz organized the first CAST workshop in April 1988, which demonstrated the acceptance of the concepts by the scientific and technical community. Next, the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST, (Las Palmas February 1989), under the name EUROCAST89, that was a very successful gathering of systems theorists, computer scientists and engineers from most of European countries, North America and Japan.

It was agreed that EUROCAST international conferences would be organized every two years. Thus, the following EUROCAST meetings took place in Krems (1991), Las Palmas (1993), Innsbruck (1995), Las Palmas (1997), Vienna (1999) and Las Palmas (2001), in addition to an extra-European CAST Conference in Ottawa in 1994. Selected papers from those meetings were republished by Springer-Verlag Lecture Notes in Computer Science nos. 410, 585, 763, 1030, 1333, 1728 and 2178 and in several special issues of Cybernetics and Systems: an International Journal. EUROCAST and CAST meetings are definitely consolidated, as it is demonstrated by the number and quality of the contributions over the years.
