

# Dominate Lane and Carry Your League of Legends Ranked Games: A Master Players Guide to Crushing Your Lane Opponent

This book is the most in-depth and detailed guide created on teaching players how to crush their lane opponent in League of Legends. Its a bold statement, but I can back it up. The book will teach you everything you need to know about completely dominating over your lane matchup (which, by the way, sometimes feels better than winning). Ive tried extremely hard to break down every micro-aspect of over 60 of the game mechanics that come into play during laning. Ive broken down every single concept into the most simple, understandable terms that even a new player will grasp. Believe it or not, there are that many possible micro and macro aspects that go into laning. Its an art. Once you read this book, you will be aware of things you never really stopped to think about before. If this book doesnt get you prepared for any possible situation you might face during laning nothing will. Here are a few of the things you are going to learn once you get the book: - The 5-step formula to winning every trade in lane, which works 100% of the times - How to build up huge advantages over your opponent by capitalizing on the small mistakes they make - How to manage the minion waves in the same way Challenger and Pro players do it - How to never depend on your junglers actions anymore - What to do when you are behind in lane and how to actually come ahead - How to stomp your opponent to the point of completely tilting the whole enemy team - How to deal with any possible situation in the laning phase - How to abuse your advantage and get the maximum out of every situation Enjoy the progress you are going to experience in your ranked games!
