

Web Information Management: A Cross-Disciplinary Textbook (Chandos Information Professional Series)

This is a cross-disciplinary text book on web-based information management for students, faculty and practitioners (in business, industry and government). The Web has emerged as a universal space of information, occasioning proliferation of electronic publications. Though efforts have been made in developing tools and methods such as search engines, metadata, portals, subject directories and subject gateways aimed at enhancing the organization of and accessibility to information on the web, more remains to be done. The book addresses gaps in the existing web-based tools and methods for information management. Cross disciplinary e.g. information science, information systems, computer science, business and records management. Addresses topical issues in web information management such as content management, e-records readiness, e-government, portals and intranets, open source software, emerging technologies-WiMax, Bluetooth, etc. Targets audience in tertiary education, government, business and industry
